PROJECTS

Personal Portfolio-v3   11/2023 - 12/2023

The third iteration of my portfolio, built with React, Styled Components, and Framer Motion for front-end with a simple server setup with Express in Node for backend. Features include:
- Dynamic Text Display: Rotates and displays text elements.
- Engaging Animations: Smooth animations to enhance the user experience.
- Easy Navigation: Provides easy-to-use navigation for users to explore.

Note App   10/2023 - 10/2023

A note-taking app developed using React and Firebase. This app allows users to create, edit, and delete notes in a simple and intuitive interface with the following features:
- Note Management: Enables creation, editing, and deletion of notes.
- Real-time Updates: Utilizes Firebase's real-time database to sync notes across devices instantly.
- Automatic Saving: Automatically saves notes while editing.

Tenzies Game   08/2023 - 09/2023

A React application for playing the Tenzies game. The game involves rolling dice and trying to achieve 'tenzies' where all dice have the same value and are held. Features as follow:
- Dice Rolling Functionality: Allows rolling and holding dice to achieve the winning condition.
- Real-time Game Monitoring: Tracks game details such as roll count, duration, and best time achieved.
- Responsive UI: Provides an intuitive interface with interactive dice and game information.
